

Action plan submitted by Burcu Deryan Eker for Erbakır Fen Lisesi - 14.03.2024 @ 09:14:48

By submitting your completed Assessment Form to the eSafety Label portal you have taken an important step towards analysing the status of eSafety in your school. Congratulations! Please read through your Action Plan carefully to see what you can do to improve eSafety further in your school. The Action Plan offers useful advice and comments, broken down into 3 key areas: infrastructure, policy and practice.

## Infrastructure

### Technical security

- › It is good practice that your ICT services are regularly reviewed, updated and removed if no longer in use.
- › It is very good that all your school devices are virus protected. Make sure you also have included a paragraph on virus protection in both your school policy and your Acceptable Use Policy, and ensure that staff and pupils rigorously apply school guidelines. If you need further information, check out the fact sheet on Protecting your devices against malware at [www.esafetylabel.eu/group/community/protecting-your-devices-against-malware](http://www.esafetylabel.eu/group/community/protecting-your-devices-against-malware).
- › An educational approach and building resilience in pupils of all ages is also key to safe and responsible online use so bring together all teachers to have a discussion on how they will talk to their pupils about being a good and safe digital citizen. See [www.europa.eu/youth/EU\\_en](http://www.europa.eu/youth/EU_en) for examples of discussions that can take place in the classroom on this topic, through role-play and group games.

### Pupil and staff access to technology

- › Ensure that the policy on mobile phones is being applied consistently throughout the school. Take a look at the fact sheet on Using Mobile Phones at School ([www.esafetylabel.eu/group/community/using-mobile-device-in-schools](http://www.esafetylabel.eu/group/community/using-mobile-device-in-schools)).

### Data protection

- › You have a good policy of keeping your learning and administration environments separate. It is good to ensure that staff training on managing these environments is up to date as you continue to review your policies. Share your policy with other eSafety Label users by uploading it to your school profile.
- › It is good that your school provides materials on the importance of protecting devices, especially portable ones. Ensure that staff are aware of these and use them. This material should be pointed out to new staff as part of their induction. Please consider uploading those as evidence at [evidence](#) and sharing with others in the forum. Also ensure that your materials are regularly reviewed to ensure they are in line with the state of the latest technology.

## Software licensing

- › Your school has set a realistic budget for software needs. This is good. Ensure that it remains this way. You might also want to look into alternatives, e.g. Cloud services or open software.
- › It is important to ensure that all new staff are briefed about the effective processes you have for the installation of new software. This will mean that the security of your systems can be maintained and that staff can try out new software applications that will help teaching and learning.

## IT Management

- › It is good that staff members with questions about software issues can contact a school helpdesk. Consider whether you need to provide training and/or guidance to new software that is installed on school computers. This is important to ensure that school members will take advantage of new features, but also that they are aware of relevant security and data protection issues.
- › It is good practice to ensure that the person in charge of the ICT network is fully informed of what software is on school-owned hardware and this should be clearly indicated in the School Policy and the Acceptable Use Policy. The person responsible for the network needs to be able to guarantee conformity with licensing requirements and that new software won't interfere with network operation.

## Policy

### Acceptable Use Policy (AUP)

- › It is good practise that in your school teachers and pupils sign the relevant school policies and that it is discussed with pupils beforehand. Consider having regular meetings to discuss them and where non-conformity is dealt with.
- › It is excellent that eSafety is an integral part of several school policies. Do all staff make reference to it when appropriate through their teaching? Look for examples of good practice and share these with staff and pupils. Produce a short case study to highlight this good practice and upload it to your profile on the eSafety Label portal via your [My school area](#) as inspiration for other schools.
- › It is good that you have an Acceptable Use Policy for all members of the school community. Regularly review the AUP to ensure that it is still fit for purpose; to ensure that your AUP is sufficiently comprehensive, take a look at the fact sheet and check list on Acceptable Use Policy at [www.esafetylabel.eu/group/community/acceptable-use-policy-aup](http://www.esafetylabel.eu/group/community/acceptable-use-policy-aup).

### Reporting and Incident-Handling

- › It is important to have a clearly communicated School Policy on this, and it should be mentioned in the Acceptable Use Policy too. What is considered to be potentially illegal can vary from person to person, so it is important that this is discussed with staff members and that school standards are set. All members of the school including pupils and teachers must be informed of them and required to respect them.

- › Are all staff familiar with the procedure for dealing with material that could potentially be illegal? Is there a named person from the school senior leadership team who takes overall responsibility in this type of case? The procedure needs to be clearly communicated to all staff in the School Policy, and to staff and pupils in the Acceptable Use Policy. Remember to report and suspected illegal content to your national INHOPE hotline ([www.inhope.org](http://www.inhope.org)).

## Staff policy

- › Ensure that all staff, including new members of staff, are aware of the policy concerning online conduct. This should be a topic that is regularly discussed at staff meetings and clearly communicated in the School Policy, and to staff and pupils in the Acceptable Use Policy. Regularly review and update both documents as necessary.

## Pupil practice/behaviour

- › It is good that pupils have the possibility to shape school activities when discussing eSafety, be it extra-curricular and curricular ones, based on what is going on in their daily lives. This way they will be more engaged and it also allows the teacher to recognise real life issues.
- › Your school has a school wide approach of positive and negative consequences for pupil behaviour. This is good practice, please share your policy via the [My school area](#) of the eSafety portal so that other schools can learn from it.

## School presence online

- › Check the fact sheet on Taking and publishing photos and videos at school ([www.esafetylabel.eu/group/community/taking-and-publishing-photos-and-videos-at-school](http://www.esafetylabel.eu/group/community/taking-and-publishing-photos-and-videos-at-school)) to see that your School Policy covers all areas, then upload this section of your School Policy to your profile page via your [My school area](#) so that other schools can learn from your good practice.
- › You have a dedicated person to monitor your school's online reputation, and this is good practice. Always be aware of any new sites that may not be immediately apparent through a regular search. Keep up to date with the latest sites and monitor these periodically, as they can be particularly damaging for schools and their pupils and staff if they present a negative viewpoint.

# Practice

## Management of eSafety

- › It is good that all staff in your school are responsible for eSafety. However, it is good practice to appoint a person who will have overall responsibility for eSafety issues to provide the focus needed. Ideally this should be someone from the senior leadership team. Ensure that this person is involved in the development and regular review of your School Policy. She or he should not only be informed, but should also fill out the Incident handling form whenever an incident arises at [www.esafetylabel.eu/group/teacher/incident-handling](http://www.esafetylabel.eu/group/teacher/incident-handling).
- › Ensure that the governor or board member appointed for eSafety has the opportunity to receive regular training and also to ensure that colleagues are aware of eSafety issues. Involve your governing body in the development and regular review of your School Policy. See our fact sheet on School Policy

## eSafety in the curriculum

- › Ensure that the eSafety curriculum keeps up with emerging issues by making full use of all available resources and ensure that it builds on prior learning, bearing in mind that pupils will need different messages depending on how they are using the technology.

## Extra curricular activities

- › Use Safer Internet Day as a mechanism to get the whole school community involved with online safety. The information and resources available at [www.saferinternetday.org](http://www.saferinternetday.org) offer an ideal opportunity to promote peer advocacy activities.

## Sources of support

- › It is great that in your school pupils are actively encouraged to become eSafety mentors. You might want to share your approach to strengthening this network with other teachers on the eSafety Label website via the forum or your school's profile page, so that others can replicate it.
- › It is good to know that other school services are involved in eSafety issues (e.g. counsellors, psychologists, school nurse). Are they also invited to contribute to developing and regular review of your School Policy? Publish a case study about how this is managed in your school on your school profile page on the eSafety Label project website, so that others can learn from your experience.
- › Ask parents for feedback on the kind of eSafety support which is being provided for them and consider innovative ways to maximise the number of parents who are benefitting from, and accessing it. See the fact sheet Information for parents at [www.esafetylabel.eu/group/community/information-for-parents](http://www.esafetylabel.eu/group/community/information-for-parents) to find resources that could be circulated to parents and ideas for parent evenings.
- › It is great that you have a staff member which is knowledgeable in eSafety issues who acts as a teacher of confidence to pupils.

## Staff training

- › Your school makes sure that every teacher is trained on cyberbullying. Please share resources that are used in these trainings via uploading them to your [My school area](#). Are you also monitoring the effect that this training had on the number of incidents?
- › Consider ways to facilitate knowledge exchange between staff members. This could be in form of an online community with a platform, an email exchange or within a frame of staff initiated meetings. A school in which all staff members are aware of eSafety related issues is a much safer school. Suggest eSafety related topics for these sessions.

**The Assessment Form you submitted is generated from a large pool of questions. It is also useful for us to know if you are improving eSafety in areas not mentioned in the questionnaire. You can upload evidence of such changes via the [Upload evidence](#) on the [My school area](#) section of the**

**eSafety Portal. Remember, the completion of the Assessment Form is just one part of the Accreditation Process, because the upload of evidence, your exchanges with others via the [Forum](#), and your [reporting of incidents](#) on the template provided are all also taken into account.**
